# SMART INDIA HACKATHON 2025

Problem Statement ID – 25012
Problem Statement Title –
Automated Attendance for Rural
Schools Theme – Smart Education
PS Category – Software

Team ID —

Team Name – HaazriHeros

## Smart Attendance System

Saving Time: It reduces the time teachers spend on administrative tasks, allowing them to focus on teaching.

Improving Accuracy: Facial recognition eliminates human error, providing a and verifiable attendance record for accurate government reporting and resource allocation.

Enhancing Accessibility: By using low-cost, widely available mobile devices, it provides a affordable solution for underresourced schools.

Date

#### FEASIBILITY AND VIABILITY

The idea is highly feasible because it leverages existing, low-cost technology to create a scalable and economically viable solution for under-resourced schools.

The project is viable because its low-cost, scalable model aligns perfectly with government initiatives, ensuring a clear path for widespread adoption and sustained growth across the education sector.

### IMPACT AND BENEFITS

The idea is highly feasible because it leverages existing, low-cost technology to create a scalable and economically viable solution for under-resourced schools.

The project is viable because its low-cost, scalable model aligns perfectly with government initiatives, ensuring a clear path for widespread adoption and sustained growth across the education sector.
